CONCLUSION

CHAPTER ONE

1.0 INTRODUCTION

SIWES simply means student industrial Work Experience Scheme (SIWE) and is the accepted, skills training PROGRAMME which forms part of the approved minimum academic standards in the various degree PROGRAMME for all the Nigeria universities. It is an effort to bridge the gap existing between theory and practical of engineering and technology, science, agriculture mechanic, management and other professional educational PROGRAMME in Nigeria tertiary institutions and the industry can (employ of laboring) it aimed at exposing, professional work methods and ways of safe guarding the work area and workers in industries and other organization. It is for mouths industrial attachment PROGRAMME for the time student in national diploma.

1.1 THE IMPORTANCE

The student industrial work experience schemes (SIWES) is important in the science that it compliment with student theoretical experience gained if properly attended. Below are some of the importance of this program are:

1. The program gives student industrial work experience scheme (SIWES) student's technical field of discipline the opportunity they have gain at school with practicing night day by day.
2. It gives room for human relation and communication skill development which one needs in his her field.
3. It allows student to know the code of conducts i.e as stipulated by the government of the constitution of the organization
4. It serves as avenue for student to make use of the theoretical knowledge complement each
5. It gives confidence to student in the manipulative, coordination and technicality of their work especially in tasks involving engineering and machinery manipulation.

1.2 AIM AND OBJECTIVES OF SIWES

Specifically, the objectives of the students industrial work experience scheme is to

1. Provide an avenue for students industrial work experience in their course of student.
2. To enhance students contacts for later job placement.
3. Provide student knowledge in real work situation, there by bridging the gap between institution work and actual practices.
4. Prepare students to be familiar with work method and techniques in handling equipment and machinery that may not be available in the institution.
5. Prepare students for the work situation they are likely for the work situation they are likely for the work situation they are likely to meet after graduation.

CHAPTER TWO

MISSION

To lead the charge in educating and disseminating knowledge in science and technology and to channel that knowledge toward solving society's challenges

VISION

To be a prestigious international university that champions innovation, self -reliance, and the development of culturally savvy and disciplined researchers and products.

2.3 PROBLEM ENCOUNTERED DURING THE PROGRAMME

1. The major problem I encountered was the problem of finance as I had to transport myself from home to the station and the organization did not pay IT student.
2. Another problem I encountered was that in the station, they see IT student as clerk thereby sending us on errands like buying food, washing plate, making tea for the staff and so on.
3. Another problem I encountered was that they are bias and underrate IT student as if they are not human being.

CHAPTER THREE

3.0 DEPARTMENT IN CURLLINKS CONCERT SANGO ILORIN KWARA STATE

1. Software Development Department: This department is responsible for designing, developing, and maintaining software applications for clients. They may also be involved in mobile app development, web-based applications, and custom software solutions.

2. Computer Training Department: This department offers educational programs to teach individuals or corporate clients various IT skills, such as computer programming, networking, software use, hardware maintenance, and digital marketing.

3. Hardware Maintenance and Repair Department: This team handles the repair, maintenance, and upgrading of computer hardware, including desktops, laptops, printers, and other related devices. They also troubleshoot hardware-related issues for clients.

4. Networking and IT Infrastructure Department: This department focuses on setting up and maintaining network systems for businesses and individuals. This includes configuring and managing Local Area Networks (LANs), Wide Area Networks (WANs), and troubleshooting network issues.

5. Web Development and Design Department: Responsible for building and designing websites, including front-end and back-end development. They create user-friendly, responsive websites tailored to clients' needs, which may include e-commerce platforms, blogs, and corporate websites.

6. Graphic Design Department: This department creates visual content for various media platforms, including logos, brochures, websites, and social media graphics. They work with clients to design compelling and brand-appropriate visual communication materials.

3.1 EXPERIENCE ACQUIRED DURING SIWES

I started my SIWES training on 20th August, 2024. The day I started I and other it was introduced to the staff of Web Development and Design Department, Curllinks Concert Sango Ilorin Kwara State. I was attached to my supervisor Mr. Sunday he taught me a great thing I can

never forget as this has greatly added a great value in my life, some of them are how to monitor radio news and how to edit news story.

Also he has trained me what HTML Element, knowing that the basic structure for html are element .

Also Basic structure of a web page

They also taught me how to Known tag placement

Also Knowing some colors and attributes of html

A lot was learn

CHAPTE FOUR

4.1 SUMMARY

The period of SIWES training as made it possible for the student to acquire the necessary fundamental experience the field of web design.

4.2 RECOMMENDATION TO SIWES

As matter of responsibilities the federal government to contribute, immensely to the upliftment of this programme by putting in place a considerable compensation for the student who embarked on this kind of stressful and dreary programme. The federal government has a lot of role to play in building up a brighter future (the next penetration) in order to maintain the peace and stability of the state. Furthermore, a lot of task also lies on the school authority to the orientate and enlighten their student on the expected things they are going to face or encountering pleasantly or in the other hand when they got their various placement of works before the commencement of the programme.

4.3 CONCLUSION

I am appealing to all institution that they should get their student involve in the SIWES programme because I believe that they can be able to know more about their profession and be able to relate with people anywhere they go for their programme because it will expose them to various technical aspect of their profession which may not be privilege to undergo in the institution.
