SIWES EXPERIENCE AND ACTIVITIES

3.0 WORK DONE

Overview of Administrative Office Experience

During my SIWES program at the administrative office of the local government, I had the opportunity to immerse myself in the practical aspects of public administration. This experience provided valuable insights into the day-to-day operations and responsibilities of the administrative office, which plays a pivotal role in the functioning of the local government.

3.1 DEFINITION OF LOCAL GOVERNMENT

Local Government:- Is the lowest tier of the government anywhere in the world. It is very important because of its closeness to the people.

The main purpose of local government is to ensure effective administration at the local level. It aims to mobilize human and financial resources for local development. A local government can be considered as a mini-government for a particular political unit or administrative division in a country. Local governments are responsible for creating a smaller unit for more effective administration.

They have the legal power to make bye-laws within their jurisdiction and are responsible for providing services to local communities. Like all unit of the government, the local government has a clearly defined area, a population, a continuing organization and the authority to undertake and power to carry out public activities. Local government is normally treated as legal entity, which means she can sue and be sued and enter contracts.

The 1976 guideline for the local government define local government. "this is the government at the local level exercised through representative council established by the law of exercise specific power with a defined area". The power should be given to the council substantial control over the local affairs as well as the power to initiate and direct the provision of services and to determine and implement project so as to compliment the activities of the state and federal governments in their area, and to ensure true devolution of function to those councils and their traditional institution and local initiative and respond to local needs and tradition are maximized.

3.2 ADMINISTRATIVE OPERATIONS AND RECORD-KEEPING

One of the key aspects of my experience was understanding administrative operations and record-keeping. I was involved in organizing and managing official documents, ensuring they were properly categorized, archived, and readily accessible when needed. This exposure underscored the importance of accurate record-keeping for efficient decision-making and compliance.

3.3 CUSTOMER SERVICE AND PUBLIC INTERACTION

My time at the administrative office also allowed me to engage with members of the public seeking government services and information. Assisting citizens with inquiries, understanding their concerns, and providing relevant information gave me insights into the importance of quality customer service in building trust and fostering positive relationships between the government and the community.

3.4 DATA MANAGEMENT AND ETHICAL CONSIDERATIONS

Maintaining accurate data was a significant responsibility within the administrative office. I learned to handle sensitive information with discretion and uphold ethical standards in data management. This experience highlighted the need for confidentiality, integrity, and transparency in handling citizens' data.

3.5 COMMUNITY OUTREACH AND EVENT PARTICIPATION

Participating in community outreach programs and government events exposed me to the local government's efforts to engage with the community. These experiences showcased the administrative office's role in facilitating citizen participation, addressing community needs, and fostering a sense of belonging.

3.6 TIME MANAGEMENT AND TASK PRIORITIZATION

Balancing various tasks and responsibilities underscored the importance of effective time management and task prioritization. I learned to juggle multiple activities, allocate time wisely, and meet deadlines—a skill-set that is crucial in a dynamic government setting.

This opportunity greatly strengthened my practical knowledge of administrative processes and broadened my understanding of Legal, Administration Office Experience Administrative Operations and Record-Keeping, Communication and Stakeholder Engagement, Customer Service and Public Interaction, Time Management and Tax, in local government operations.

5.1 CONCLUSION

My SIWES was a very successful one, I had an insight of the Information Technology world. I have now known the power of programming and graphics designing. With this, I will be able set a goal for myself to build a complete website and write codes for different programs. SIWES as a course has truly exposed me to the challenges faced in a growing I.T world that is dependent on computers.

5.2 RECOMMENDATION

- The school management should consider the fact that students find it difficult to be admitted to a particular organization for attachment and urge these organizations to accept students.
- ii. The SIWES body should try as much as they can to assist students financially when carrying out this very industrial attachment.
- iii. Place of attachment should try as much as possible to employ educated workers to avoid code-switching while lecturing.
- iv. A mass enlightenment campaign should be carried out, to enable industries and establishments to know the importance of SIWES to the future of students and the society at large.
